

LEISURE DIVISION (LeD) CHECKLIST for RIDE MANAGERS

- _____ Obtain the LeD distance and pace from the current NATRC Rule Book
- _____ Procure LeD judge(s) from the Judge's List in the Admin/Ride Management documents at www.natrc.org.
- Perform a courtesy "stabling safety check" for LeD riders camping overnight. Any ride official can do this as it is not part of the competition. It is an insurance requirement and an educational opportunity. Note if someone doesn't comply.
- _____ Sample ride flow:
 - 8-10 am Registration
 - 10 am Briefing (with the judge(s))
 - 11 am Check-in the horse (untacked) with the judge(s)
 - 12 pm Horse tacked up, ready to ride, time out
 - 3:30 pm Time in
 - 4 pm Check-out
 - 5 pm Awards
- _____ Let the competitors know the ride flow schedule ahead of time so they are prepared.
- _____ Hold the ride briefing the morning of the ride.
- _____ Have the ride briefing immediately following close of registration. (Trying to check in the horses first, then going back to a briefing creates some confusion and makes it a harder to keep riders organized.)
- _____ Send riders from ride briefing to check-in area where the judge(s) will be waiting. (Checking each horse within 2 minutes +/- including a straight out and back trot is easily doable.)
- _____ Have riders go from check-in to getting their horses' tacked and ready to go. Give clear instruction on location of where they will time out and time back in.
- _____ Have a comprehensive plan for judging spots prior to timing out riders. (Given the shorter time and distance of an LeD ride, there is little leeway for moving the judge(s) around to obstacles.)
- Provide judge(s) with a knowledgeable driver who is familiar with the trails and access points.
- _____ Provide the judge(s) with a scribe.
- If the P&R is conducted as part of a regular ride P&R, instruct the P&R chair to keep the LeD cards separate.
- Make sure the P&R chair is aware of the standard LeD hold parameters of go on 16 and hold on 17 and writes these on the LeD P&R cards ahead of time. (This criterion is a matter of simplicity in recognition of the fact that, for the short distances and slow speeds of this division, any horse with a pulse and/or respiration of 17 or above needs extra watching.)
- _____ Place the "forward motion point" approximately 1 mile from the finish. (This keeps the ratio of the forward motion point to total distance similar to the other divisions.) Carefully explain our forward motion requirement, and the mileage from it to the finish, at the briefing.
- Have awards for the LeD riders ASAP after their checkout. (Do not wait until your evening ride briefing for this...you may find that many/most of your LeD riders have left!)
